Attention: Tammara Peyton
Examiner
571.272. 4157

Dear Sir:

The Applicant respectfully responds to the Office Action mailed 30 August 2005 as follows:

03-1120

RESPONSE

The Examiner required restriction to one of the following patentably distinct inventions under 35 U.S.C. 121:

- I. Claims 1-9 and 13-26, directed to a system method for enhancing data throughput in a SCSI topology in a nexus pipeline unit including an initiating unit; or
- II. Claims 10-12, directed to a nexus pipeline circuit including a plurality of load stages including a plurality of nexus attributes.

The Applicant elects the claims of Species I, claims 1-9 and 13-26, directed to a system method for enhancing data throughput in a SCSI topology in a nexus pipeline unit including an initiating unit.

If it is felt for any reason that direct communication with the Applicant's attorney would serve to advance prosecution of this case to finality, the Examiner is invited to call the undersigned Peter P. Scott at the telephone number below.
